## React Developer

---

Self-taught React developer with a strong focus on building dynamic user interfaces and enhancing user experience through component-based architecture and state management.

## Technical Skills

---

- **Frontend:** React.js, Redux, JavaScript, Tailwind CSS, MUI, HTML5, CSS3
- **Backend:** Node.js, Express.js, MongoDB, RESTful APIs
- **Concepts:** Single Page Applications (SPAs), Component-based Architecture, State Management, Responsive Design, API Integration

## Projects

---

### Kanban App — React & Redux Application

kanban-frontend-xi.vercel.app

- Built a task management app using React, Redux, and Tailwind CSS.
- Implemented drag-and-drop task management and state persistence for a seamless user experience.
- Deployed on Vercel for continuous integration and delivery.

### Seminar Hall Booking App — React & Redux

- Developed a seat booking system using React and Redux for state management.
- Focused on improving user experience through efficient state persistence.
- Deployed on Vercel for easy scalability.

### Language Learning Platform — React, Redux, Node.js, MongoDB

GitHub:

github.com/Shihas07/language-translation-withchat

- Developed a real-time language learning platform using React and Socket.io for live chat.
- Integrated Node.js and Express for backend services and MongoDB for user data management.
- Used Redux for managing application state and user preferences.
- Deployed on Vercel for scalability and global accessibility.

### Job Seekers — Full-Stack Web Application

- Built a job seekers platform using React, MUI, Node.js, and MongoDB.
- Implemented role-based interfaces for admin, employers, and users, allowing job management and applications.
- Currently integrating advanced features like application tracking and employer analytics.

## Professional Experience

---

### Self-Taught Full-Stack Developer

October 2023 – Present

- Developed and deployed full-stack applications using React, Node.js, and MongoDB.
- Created RESTful APIs using Node.js and Express, with MongoDB for database management.
- Optimized performance by efficiently handling backend logic and frontend rendering.
- Integrated third-party services like payment gateways (Razorpay) and implemented JWT authentication for secure access.
- Used Git and GitHub for version control and collaboration.

## Education

---

### B.Sc. in Computer Science

Graduated: 2021

Calicut University, Kerala, India
